HM 0359 PE

Technical Data Sheet

Polyethylene, High Density, Black Compound

Nominal

Product Description

HM 0359 PE is a black (with carbon black) high density polyethylene copolymer (with 1-Hexene) designed for the extrusion of pressure pipes.

HM 0359 PE is characterized by outstanding environmental stress crack resistance, high stiffness, high impact strength and good processability.

Product Characteristics

Application Pressure Pipes
Processing Method Extrusion

Market Pressure Pipes. Water. Gas. Industrial

Features Black Pipe Compound. Large Diameter Pressure Pipes. Bimodal

Typical Properties	Value	Units	Test Method
Physical			
Melt flow rate (MFR) (190°C/2.16kg)	0.08	g/10 min	ISO 1133
Melt flow rate (MFR5) (190°C/5.0kg)	0.3	g/10 min	ISO 1133
Melt flow rate (HLMI) (190°C/21.6kg)	8.5	g/10 min	ISO 1133
Density (pellets, pigmented)	0.959	g/cm³	ISO 1183
Mechanical			
Tensile Modulus (1 mm/min)	900	MPa	ISO 527
Tensile Strenght at Yield, (23°C, 50 mm/min)	23	MPa	ISO 527
Elongation at Break, (23°C, 50 mm/min)	600	%	ISO 527
Thermal			
Vicat Softening Point (1 kg)	128	°C	ISO 306
Chemical			
ESCR (Condition C)	≥5000	hour	ASTM D1693
Other			
Carbon Black Dispersion	≤ 3	grade	ISO 18553
Carbon Black Content	2.3	%	ISO 6964

Notes

These are typical property values not to be construed as specification limits

REACH

Polyethylene are exempted from registration under REACH. However, the corresponding monomers (used as raw materials for polymer production) and relevant additives have been registered. Please see related Declaration of Compliance for Plastic Food Contact Materials (DoC for PFCM).

Packaging

Polyethylene pellets is typically packed in polyethylene bags with net weight of 25kg each. 50 bags are stacked on a flat wooden pallet (dimensions: 1100mm x 1300mm x 150mm) with net weight of 1250kg per pallet that is stretch-hood film wrapped. Upon agreement with a customer PE pellet can be packed into big bag sized for 1000kg on wooden pallet (dimensions: 1140mm x 1140mm x 150mm) without stretch-hood film wrapping.

Storage

Polyethylene 25kg 1000kg big pallet stored product packed in bags bags stacked wooden shall be on in enclosed dry place preventing from direct sunlight at least meter far from heaters, at temperature min. -15°C / max. 35°C, relative humidity max. 80%. Prior to processing PE product bags shall be kept in production area for at least 12 hours.

PE shelf life is 60 months from the date of manufacture.
